

Filtering Content

Filtering content using the search bar

Step 1: Type in some text in the search bar, then press the search button

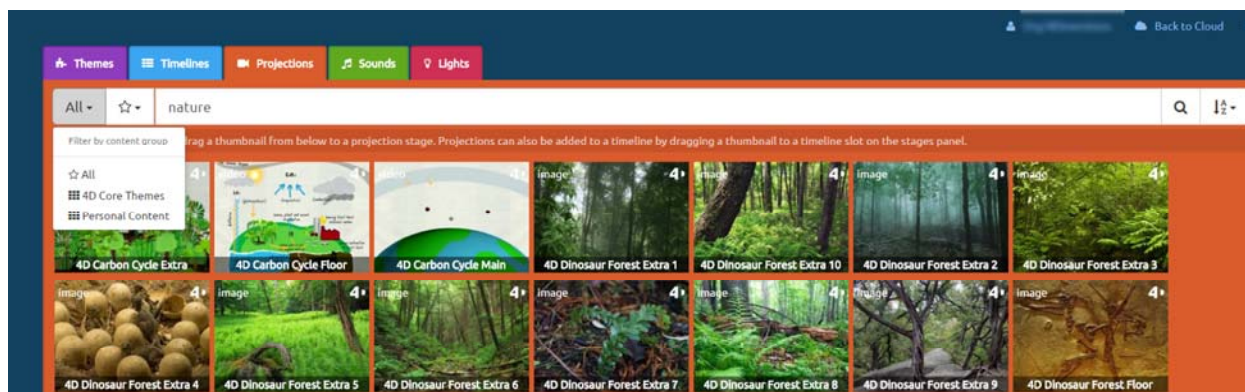

You can search for content by typing text in the search bar and pressing 'enter' or the search **Q** button. For example, the image below is showing all projection content with the keyword **Nature**.

Filtering by content group

Step 1: Click the button to the far left of the search bar area (by default it will say All)

You can filter your content by content groups that have been set up in the GenIE 2 cloud. Click the button to the far left to the search bar above the content thumbnails and you will get a dropdown menu.

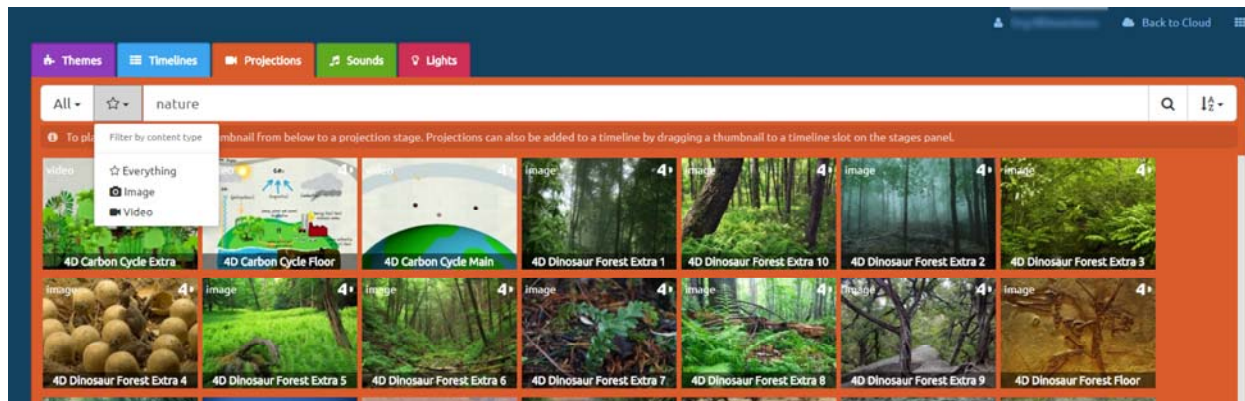

Step 2: Select the group you want to filter by

Once you select a group, you will only be able to see content thumbnails that belong to that group. Selecting 'All' will remove this filter.

Filtering by content type

Step 1: Click the second button from the far left of the search bar area (indicated by a star icon)

Click the star icon ☆ by the search bar and you will be able to filter by content type. For example, in the image below we are in the projections tab and we can filter by image or video.

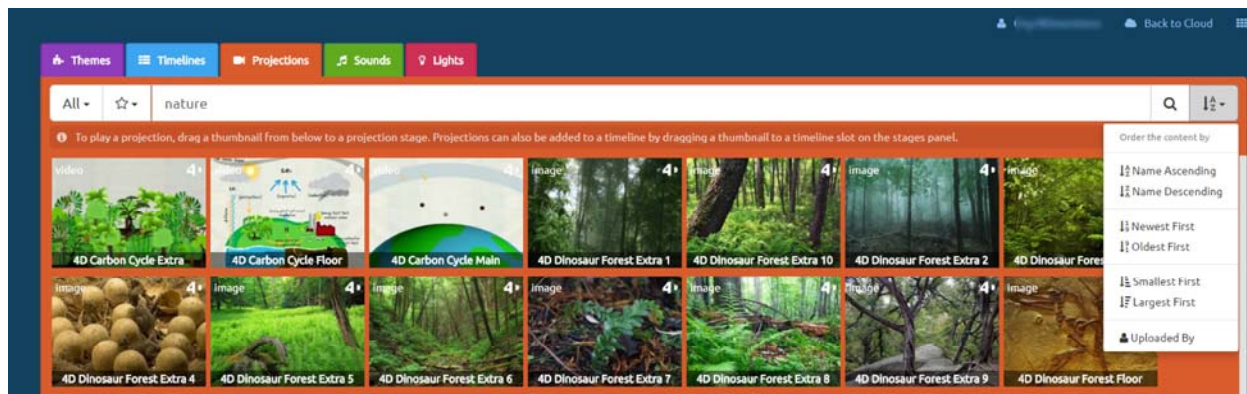

Step 2: Select the type you want to filter by

Once you select a content type, you will only be able to see content thumbnails that belong to that type. Selecting 'Everything' will remove this filter.

Ordering content

Step 1: Click the button to the far right of the search bar (to the right of the magnifying glass icon)

Click on the icon **to the right of** the search icon (Q) and you will see a dropdown with ways to order your content thumbnails.

Step 2: Select how you want to order your content

You can order your content alphabetically (**Name Ascending** or **Descending**), the date added (**Newest/Oldest First**), filesize (**Smallest/Largest First**), and alpha-numerically by the uploader (**Uploaded By**).
