

# Playing a YouTube Video

## Playing a YouTube video

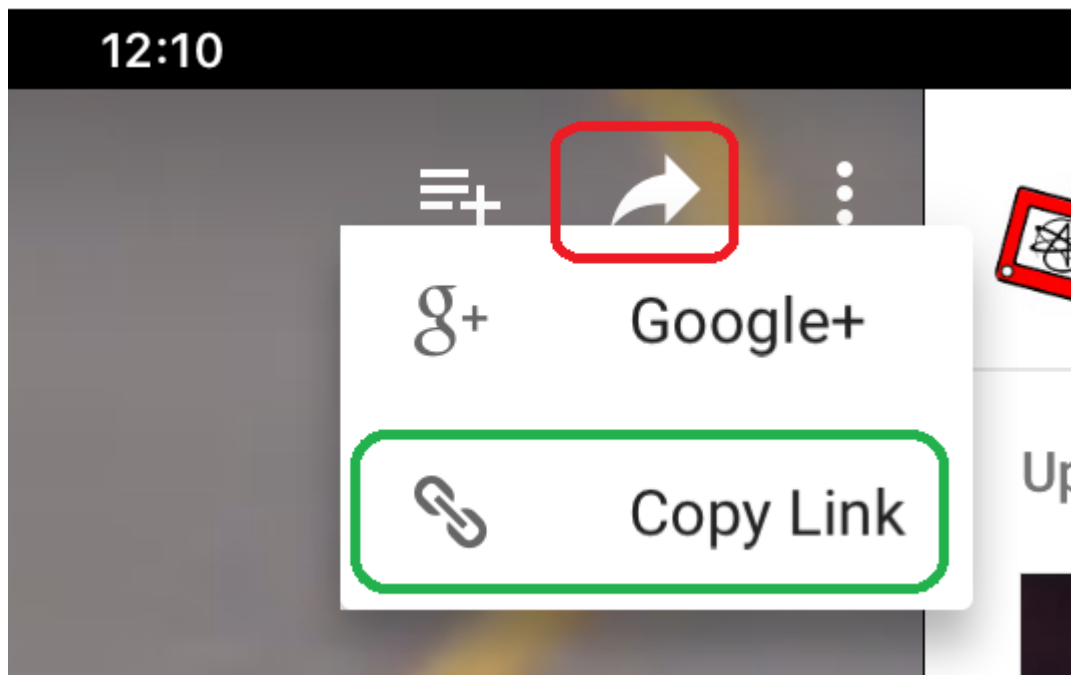

### Step 1: Select the video you want to play

On a PC or laptop, visit <http://youtube.com> (<http://youtube.com>) and locate the video you would like to show. Then select the URL link in the address bar (highlighted in the image below).

To select the URL link, click on the text, then press **CTRL+A** followed by **CTRL+C** on the keyboard.

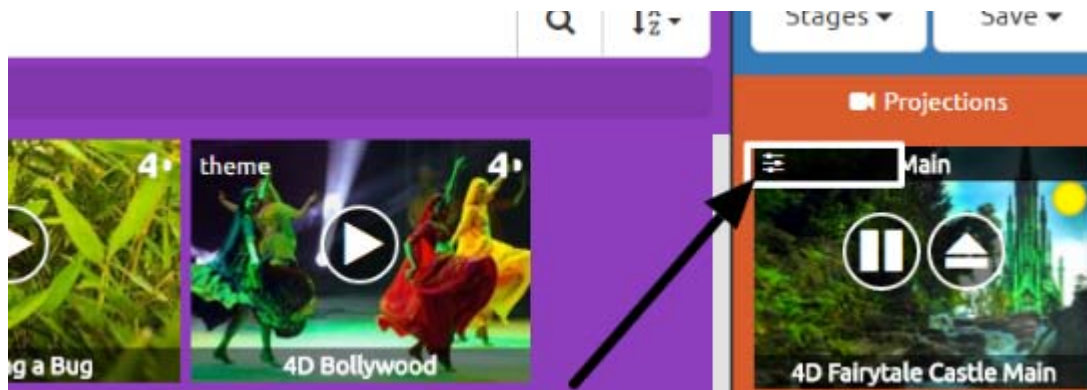

If you are on a mobile device (i.e. iPad) then you can use the **Share** button (see red highlight below) in the **YouTube App** and then **Copy Link** (see green highlight below).

## Step 2: Choose the stage you want to play on

Back on the **Room Controller**, the next step is to choose the stage you want to play the video on. For instance, the **Main** display.

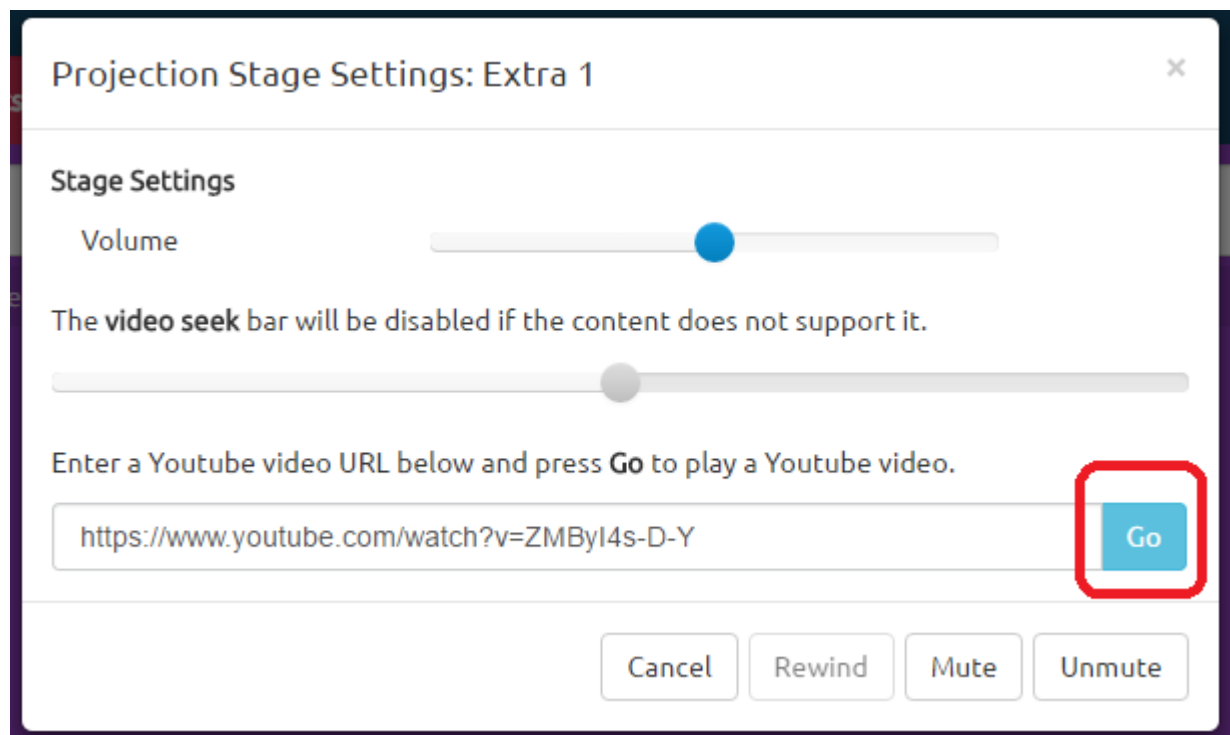

Click the **settings**(⚙️) icon to open the additional options for that stage.

## Step 3: Paste the link into the YouTube box

To paste the link, on your keyboard press **CTRL+V** . If you are on a mobile device, press down on the YouTube box and press **Paste** when the box appears.

It should look something like the below.

## Step 4: Press Play

Next, simply press the **Go** button to the right.

If the video link is invalid, you will see some red text beneath the bar. Otherwise you must accept the disclaimer to play.

In some instances, it may not be possible to play the video due to copyright.
