

Using GenIE 2 on the iPad

Step 1: Log into your GenIE 2 cloud

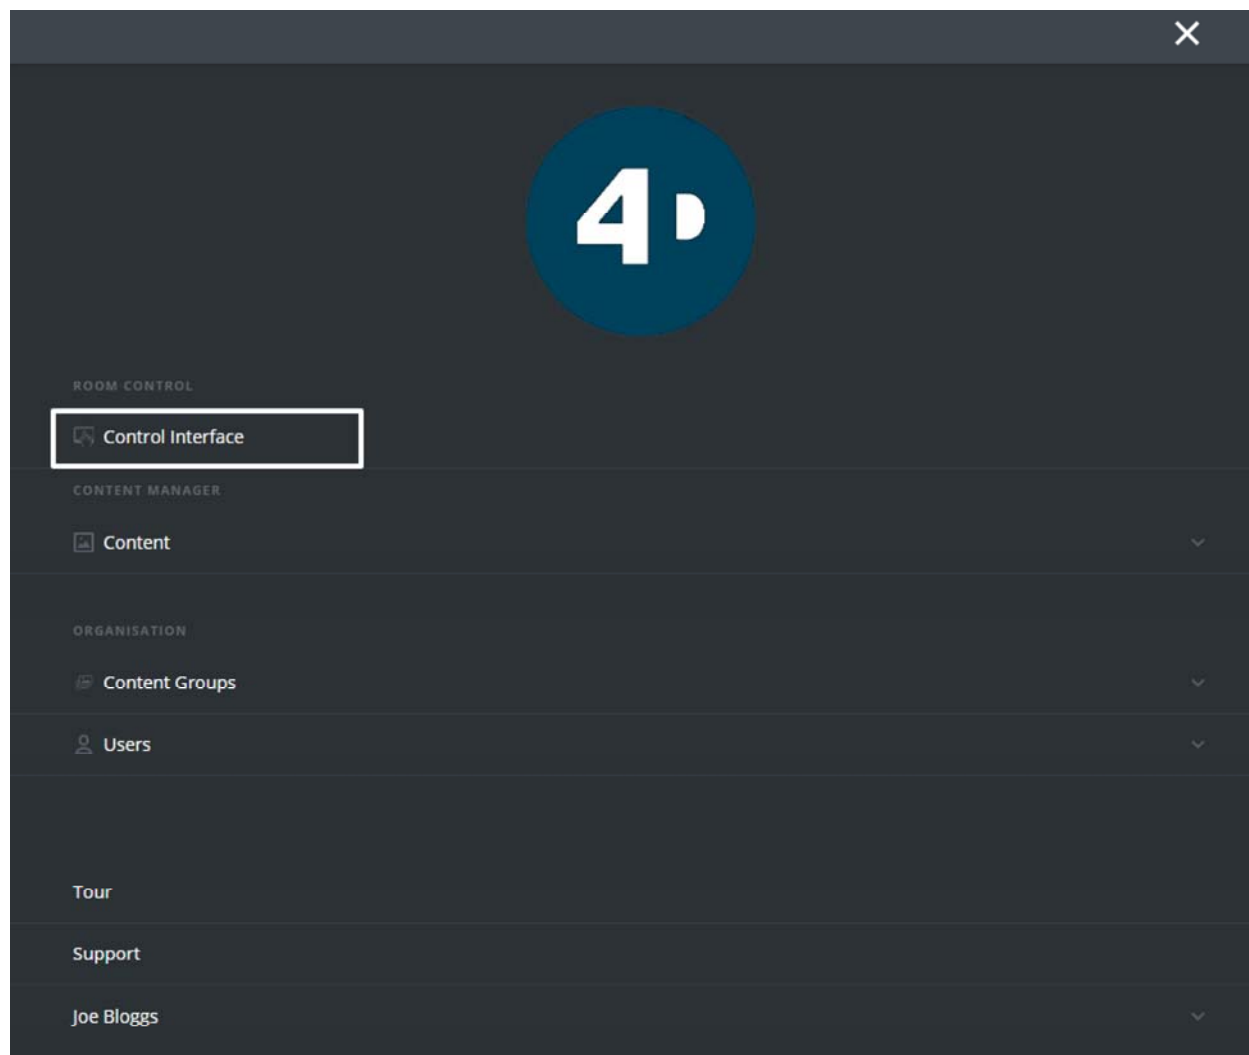

To use the GenIE 2 room controller application on the iPad, firstly open a web browser on your iPad (e.g. Google Chrome), and log into your GenIE 2 cloud.

Step 2: Click on Control Interface

Once you've logged in, press the button on the top right to bring up the navigation menu (see below).

Then press **Control Interface**.

If you have multiple rooms attached to your account, you will be shown a list of these spaces. Select the space you want to control and you will be taken to that appropriate room controller. If you only have one space, you will be taken to the appropriate room controller automatically.
